

Tree benefits on your Health

Tree Canopy percent in Texas counties

The higher the percentage the higher the health benefits!

Tree canopy is the part of the city that's shaded by trees. There are many benefits to a higher percentage such as clean air. Trees strengthen a communities respiratory health, through the production of oxygen they intercept airborne particulates, and reduce smog.

They also promote greater physical activity and reduces stress!

County comparison

Webb

1 out of 250,304
of County residents

Benefit every year from avoided health incidents

Hardin

423.9 out of 54,635
of County residents

Benefit every year from avoided health incidents

Hidalgo

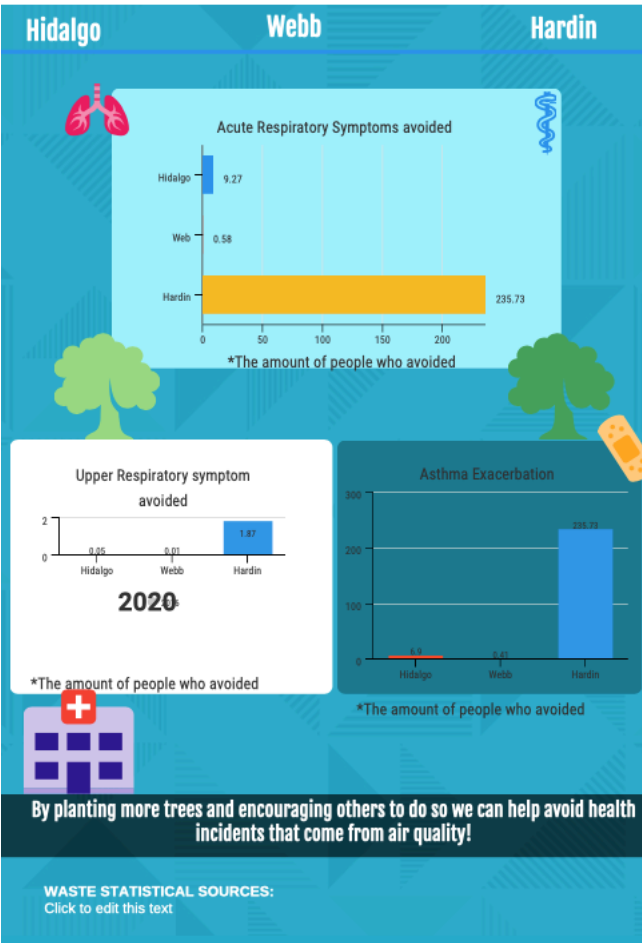

16.4 out of 774,769
of County residents

Benefit every year from avoided health incidents

These different counties each have a wide range of canopy coverage percentage. The higher the percent the higher the chance of avoided annual health incidences with in that population.

Annual Avoided Health incidence due to improved air quality
